Customer Problem Statement Template:

A well-articulated customer problem statement allows the team to find the ideal solution for the challenges the customer faces. It also builds empathy for how the customer perceives the product or service.

Problem statement for this project

I am a ServiceNow administrator / data analyst, **trying to** load large amounts of spreadsheet (Excel) data into a ServiceNow table, **but** manual entry is slow and repeated imports create duplicate records, **because** the spreadsheet columns do not automatically match table fields and there is no rule to identify records that already exist, **which makes me feel** frustrated and worried about the quality of my data.

Problem statements

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A ServiceNow administrator	Import bulk data from an Excel spreadsheet into a ServiceNow table	Typing or copying records one by one takes too long and causes errors	Spreadsheet columns are not linked to the table fields	Frustrated and overloaded
PS-2	A data analyst who updates data regularly	Re-import an updated spreadsheet without creating duplicate records	Every import inserts the same records again	No coalesce field is defined to match existing records	Worried and not confident in the data
PS-3	A business user who views reports	See accurate reports and dashboards	Reports show duplicate and invalid data	Data is not validated and transformed before it reaches the target table	Doubtful about decisions made from the reports
