Project Design Phase-II

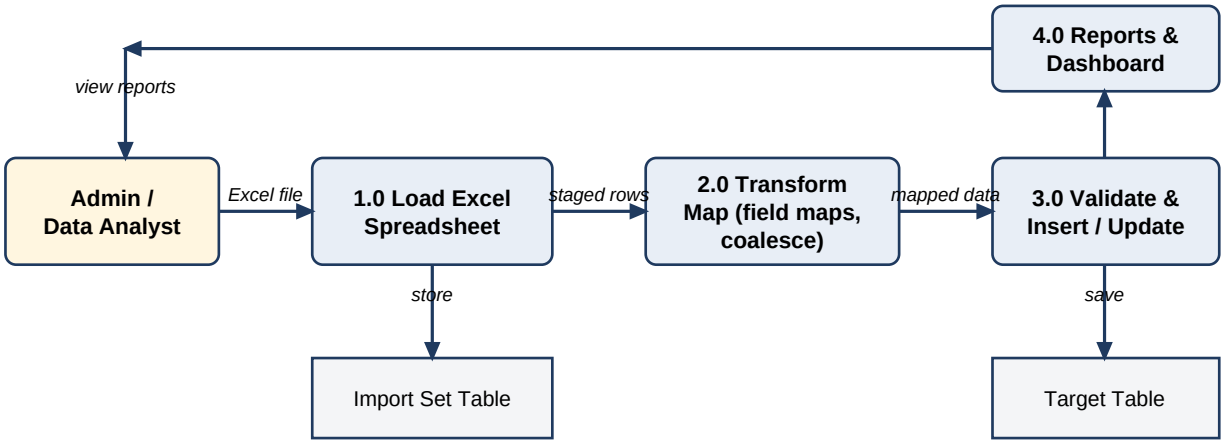
Data Flow Diagram & User Stories

Date	08 October 2026
Team ID	_____
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a visual representation of the information flows within a system. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Level-0 DFD: Import Data using Transform Maps



Flow: The user uploads the Excel spreadsheet; the data is staged in the Import Set table; the Transform Map maps and validates each row, then inserts new records or updates existing ones (coalesce) in the Target table; reports and dashboards read the Target table and are viewed by the user.

User Stories

Use the below table to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Administrator	Creation of Spreadsheet and Table	USN-1	As an administrator, I can create a spreadsheet with column headers and data to be imported.	The spreadsheet is ready with correct headers and data	High	Sprint-1
		USN-2	As an administrator, I can create a custom table with the required fields.	The table and its fields are visible in ServiceNow	High	Sprint-1
	Creation of Import Set Table and Transform Map	USN-3	As an administrator, I can load the spreadsheet to create an import set table.	The import set table holds all spreadsheet rows	High	Sprint-1

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
		USN-4	As an administrator, I can create a transform map from the import set table to the target table.	Source columns are mapped to target fields	High	Sprint-1
Data Analyst	Transform Data & Validate, and Enable Coalesce	USN-5	As a data analyst, I can transform the data and validate the imported records.	Records appear correctly in the target table with no errors	High	Sprint-2
		USN-6	As a data analyst, I can enable coalesce so duplicate records are avoided.	Re-importing updates existing records and does not create duplicates	High	Sprint-2
		USN-7	As a data analyst, I can insert new data in Excel format and import it again.	Only the new rows are inserted	Medium	Sprint-2
Business User	Creation of Reports & Dashboards	USN-8	As a business user, I can view a report of the imported data.	The report shows accurate data	Medium	Sprint-2
		USN-9	As a business user, I can see the report on a dashboard.	The report is visible on the dashboard	Medium	Sprint-2
